

**SLOVAK**

**EDUCATIONAL**

**SYSTEM**

# School's structure

# The current system of regional schools in Slovakia are:

- Infant schools
- Primary schools
- High schools
- Special schools
- Primary Art schools
- Educational facilities
- Interest-educational-equipment
- School special-purpose facilities

# Primary schools

- For children from 6 – 15 years
- From first to fourth year of study constitute the first step of basic education
- According to ISCED classification at this stage is an important basis systematic study: reading, writing and mathematics, acquisition basic components of literacy.

# Primary schools

- From fifth to ninth year of study constitute the second step of basic education
- Slovak primary school graduates would have relatively deep knowledge mainly from the Slovak language and Literature, Mathematics, foundations of natural and social sciences, ethics or religion and basic manual skills.

# High schools

- **General High schools** - provide general education and is intended primarily for students seeking directly to university
- **Vocational high school** - schools prepare students to perform specific occupational technical, medical, administrative, economic, educational nature. The study lasts four years and is completed GCSE
- **Vocational school** – schools prepare students to occupation, study lasts two or three years.

- Thank you
